

TIME ATTENDANCE APPLICATION

EMPLOYEE MODULE:

Centralize and manage employee data comprehensively, providing HR professionals with a holistic view of the workforce for strategic decision-making.

ATTENDANCE MODULE:

Precisely track and monitor employee attendance, offering detailed insights into work hours, attendance patterns, and the option for advanced biometric integration.

CHECK-IN CHECK-OUT:

Check-in/out is the system that marks attendance activity, used to calculate how much duration the employee works, and from the activities, attendances are created. Which tracks all the in-out activities of the employees.

LEAVE MODULE:

Optimize leave management with a user-friendly interface for requesting, approving, and monitoring leaves, ensuring compliance with organizational policies.

ASSET MODULE:

Efficiently manage physical assets with a dedicated module, handling asset requests, allocation, and tracking for effective resource utilization.

PERFORMANCE MODULE:

Elevate employee performance through a comprehensive system, incorporating goal setting, regular feedback mechanisms, and strategic development planning.

MOBILE ATTENDANCE CHECK-IN / CHECK-OUT:

Employees can conveniently mark their attendance using the mobile app, with support for both check-in and check-out actions. The app includes geolocation tracking, ensuring that attendance records are linked to specific locations — whether employees are on-site, working remotely, or visiting clients.

In addition, employees can apply for leave and view their leave balances directly from the app. Managers can seamlessly review and approve leave requests, making the process efficient and paperless.

MULTIPLE SHIFT ASSIGNMENT 24-HOUR DUTY REPORTS:

Easily assign shifts to employees based on duty rotation, department, or project requirements. Our system supports fixed, rotational, split, and overnight shifts — giving you full flexibility for any work schedule.

It accurately tracks attendance even for overnight or cross-midnight shifts, ensuring 24-hour coverage without errors.

With auto shift detection, the system automatically identifies which shift an employee belongs to based on their check-in and check-out times.
